

Sewer Hose Carriers and Storage Tubes

Versatile. Functional. Affordable. Only from D&W.

SUPER-TUBE

Allows for the biggest hose fittings!

D&W Inc.'s new and versatile Super-Tube can be mounted undercarriage or under the frame tongue. Super-Tube opens on both ends for super-easy access. Unlike screw-in plugs, which often bind and stick, our built-in mounting bracket/hatch assembly features roadworthy hatch-type doors with a positive latch that operates easily in tough, dirty undercarriage environments. The Super-Tube's roomy 4 5/8" diameter allows for storage of sewer hoses with fittings attached or is the ideal place to stow fishing poles and similarly shaped gear. D&W Inc.'s sturdy new Super-Tube is made of tough heavy-duty black polymer that will blend perfectly with the RV and is available in any length up to ten feet.

Lockable for secure storage (lock not provided)

Provides additional storage

Can be hitch-frame mounted

Can be undercarriage mounted

SANI-TUBE

Popular Sani-Tube is D&W Inc.'s original sidewall mount sewer hose carrier. This economically priced 4" tube accommodates a 3" sewer hose and is designed to fit smaller spaces. The convenient hatch door features a proven easy-to-use latch with rust-free components and is made of a specially blended, extremely UV resistant co-polymer that resists yellowing. Sani-Tube is offered in standard and custom lengths up to ten feet. Choose hatches in white, black or grey.

MAXI-TUBE

Maxi-Tube has the same secure, easy-to-use hatch as Sani-Tube, but features a larger 4 1/2" heavy duty tube like the Super-Tube. The wider opening allows storage of long, bulky items, such as fishing rods or ski poles, as well as sewer hoses with connection fittings attached. Choose Maxi-Tube in any length up to ten feet. Hatches come in a choice of white, black or grey and feature a durable twist latch with long-lasting all rust-free components for superior function.

FLEXI-TUBE

Flexi-Tube combines the benefits of a recessed, flexible, rust-free tube with the ability to fit confined areas. This bendable and compressible four inch diameter solid aluminum tube can be easily manipulated to avoid wheel wells, plumbing, vehicle supports and other obstacles. Flexi-Tube has the same hatch options as D&W Inc.'s rigid tubes, including a twist latch opener with stainless steel components and color choices of white, black or grey. Choose any length up to eight feet.

Additional Features

Hatches are offered in white, black or grey.
Replacement carriers and hatches are obtainable at: www.dwincorp.com

All D&W Inc. hatches have a handy twist latch with no-rust stainless steel components.

- Custom lengths and configurations to meet your needs. (Ordering length is screw hole to screw hole.)
